

A cut above the rest. European inspired fasteners that add class and style with attention to the little details.

A CUT ABOVE THE REST

SKÄRA screws are a cut above the rest. European inspired fasteners that add class and style with attention to the little details.

Premium design allows for easy drilling into hardwoods and other exterior timber structures. The SKÄRA screw is not limited to a specific job, they can be used in a wide variety of applications. Ideal for: wooden facades, fencing, decks, board walks, wooden flooring, timber structure construction, retaining walls.

Available in countersunk and Pan Washer head.

The Pan Washer head screw – can be used as an alternative where a coach screw and washer would normally be used. No pre drilling required*.

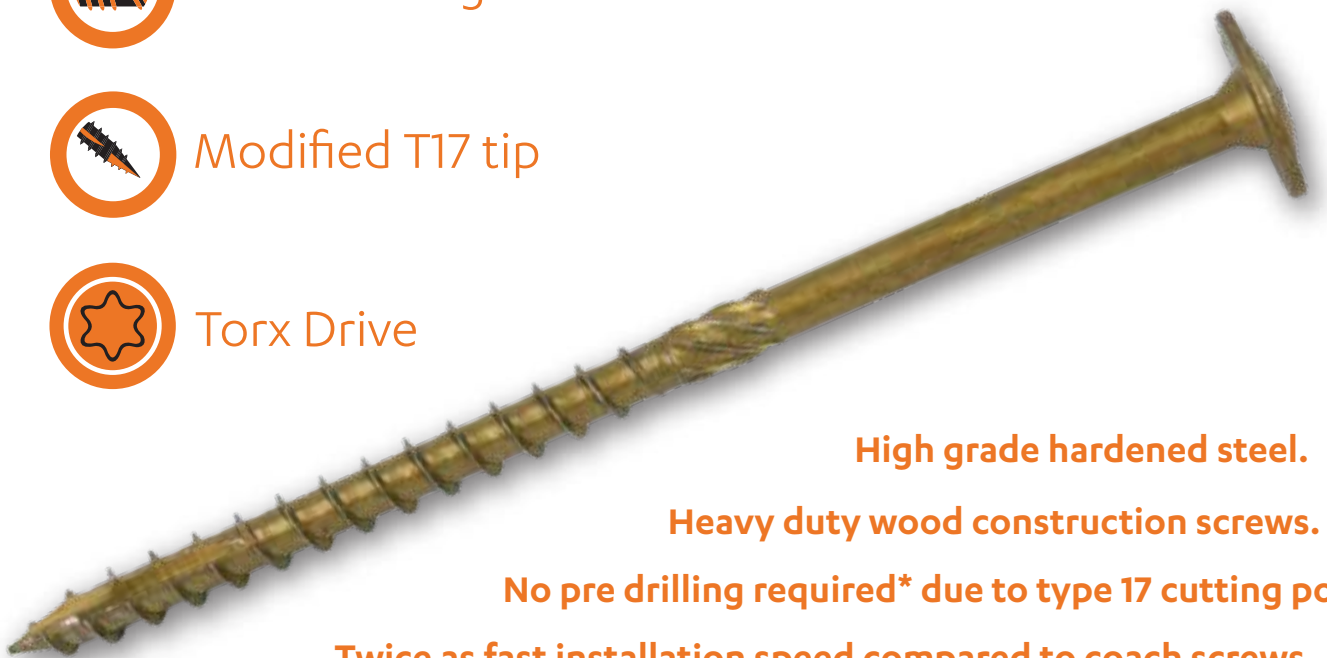

Double fixing thread

Modified T17 tip

Torx Drive

High grade hardened steel.

Heavy duty wood construction screws.

No pre drilling required* due to type 17 cutting point.

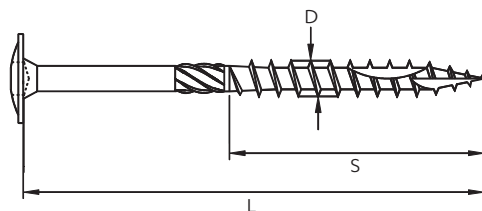

Twice as fast installation speed compared to coach screws.

Milling ribs on the shank for lower screwing torque. Smoother drive.

KTX-Nano coating Class 4. material 10B21 + bending angle > 30°.

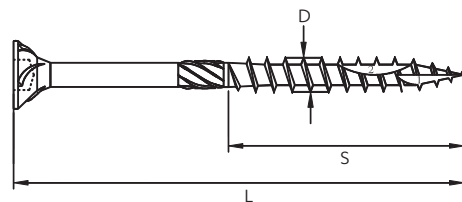

* Except in some hardwoods. Fortress® always recommends you talk with your local timber merchant expert before drilling or screwing timbers.
